Like the spice of old, I've entered, Searching sil the richest paris, Bringing back these granes of Eschol From the Canaan of your bears: NOTICES OF THE PRESS:

NOTICES OF THE FRESS:

"There is strength as well as beauty in this tale of domestic leve and trial—illustrating the power of faith in God. We mean to copy some pasaage from it, showing the capacity of the writer to draw pictures of life with great effect."

"The author of 'Sliverwood' has produced an original novel of more than ordinary merit. The story is well esnectived, and develops a variety of phases of human nature. Some passages are full of pathos, and the general sentiment of the book is excellent. In depicting the lights and shadows of American domestic life the author has been peculiarly happy."

"The present work has no harrowing pict, nor the exciting interest of a highly-wrought novel. It is the product of a reined and chastened mind, and is composed mostly of what had actually secured within the author's own knowledge. It evinces correct sentiment, talent, and the hand of a ready writer, and inculcates excellent moral and religious lessons. We wish the work such success as will encourage its author to cultivate still farther her literary gifts."

"The style of this work is beautiful; its philosophy simple, yet profound, its theology and morality pure and truc; its sentiment sparkling, yet always conservative. The original poetry, in which the book abounds, itself attests the gonius of the author."

These Londs were granted by the Government to sid in the construction of this Railroad, and are among the richest and most fertile in the State. They extend with the Read from Obleago on the north-west to Calro at the worth, and thense to Galeria and Dussieth in the extreme north-western part of life State. Most of those lands lie immediately on, and within at miles of, the Road, and none are more than offecer miles distant from it, hence ready and choop facilities are furnished for transporting their products to any of the Esseren of Southern markets. The great increase of population by immigration, he, and the consequent rapid growing of the Statem of Southern markets. The great increase of population by immigration, he, and the consequent rapid growing home domain for every labe of hem and garden produce.

In the northern and contral parts of the State Fraise Lands.

redechmate, interspersed with nagaratus and predechmate, in the southern the timber is more abundant and exceedingly valuable.

The soil is a dark rich mold, from one to five feet in depth, is gontly rolling and peculiarly fitted for grasing cattle and rolderies, the part of the part of the first of the part of the Union; while living streams and springs of excellent water abound.

Economy in cultivating and great produgitiveness are the well-known characteristics of illinois lands. Trees are not required to be cut down, stomp grubbed, or stone picked oil, as is generally the case in cultivating new land in the older flates. The first crop of iridian corn, planted on the newly-broken sod, usably repays the cost of plowing and fencing.

Wheat sown on the newly-turned sod is sure to yield very large profits. A man with a plow and two yoke of ones will break one and a half to two seres per day. Contracts can be break one and a half to two seres per day. Contracts can be break one and a half to two seres per day. Contracts can be break one and a half to two seres per day. Contracts can be seen of the presence of the first, and under a high state of califysticulation the second year.

Corn. grain, cattle, etc., will be forwarded at reasonable rates.

Corn, grain, cattle, etc., willighe forwarded at reasonable rates to Chicago, for the Eastern, and to Cairo for the Scuttera market.

Bituminous Coal is extensively mined along the Read, and supplies a cheap and desirable fuel, being furnished at many points at \$1.20 to \$4 per tun. Wood can be had at the same rate per cord. Extensive quarries have been opened in the mouthern part of the State, near the line of this itead, of Smilding Stone of excellent quality—such as which can be bad for little more than the expense of transportation.

The Gevernment lands, in the Land States, having generally been withdrawn from market, emigrants from the Eastern States and Europe can be accommodated by this Company with whalls Farms, at the old prices and turns, which, in all probability, will double in value within twelve months.

When those lands are restored to market, persons who think of settling on them, or in Minnesota, should bear in mind that the Lands of this Company, at the prices for which they are rold, are better investments than those in other States or Toricories more remote from market, at Government prices, for its order to the case with Illinois lands.

The name remarks hold good in relation to the lands in the Territories of Kanasa and Nebrusha; for although weamt lands may be found near the water-courses, the distance to market is the Territories of Kanasa and Nebrusha; for although weamt lands may be found near the water-courses, the distance to market gither in wagons or Staterupted water communications increases the expenses of transportation, which is not because in the vater courses, the distance to market gither in wagons or Staterupted water communications increases the expenses of kransportation, which must be borne by the settlers in the reduced price of their products, and to that extent precisely fire the incomes from the farme, and at Middle States, to market manually said overly year reduced.

The great is ritility of the lands now ofered for sais by this Company, and their sourcement, janua

Mil finally paid for.

MYRREST WILL BE GHARGED AY ORLY TREES PER CENT PER
As a security to the performance of the contract, the first two
years' interest must be paid in advance, and it must be undertood that at least one testite of the land purchased chair years'
he brought under sulfivation. Twenty per cent from the credit
price will be deducted for cash. The Company's constructed
bonds will be received as cash.

Heady-framed Farm Buildings, which can be set up in a few
days, can be obtained from responsible persons.

They will be 12 feet by 20 feet, divided into one living and
three bed-rooms, and will cost complete, set upon ground chosen
unywhere along the road, 0 250 in each, enclosive of transportation. Larger buildings may be contracted for at proportionate
unites. The Company will forward all the materials for such
buildings over their read promptly.

It is believed that the price, long credit, and low sate of interest charged for these lands, will enable a man while few
hundred coliurs in cash and ordinary industry to make hisself
independent before all the purchases money becomes dae. In
the mean time, the rapid settlement of the country will probably have increased their value four or fire-fold. When required
formation and aid in selecting lands.

Circulars, containing numerous instances of successful farming, signed by respectable and well-known farmers living in the
adhiphondo of the railroad lands, throughout the State—alor
the cost of tencing, price of cattle, expense of harvesting,
the such and or contract—or any other information—will be
cheerfully given on application, either personally or by letter,
in English, Franch or German, addressed to
